

CSIT751 (Core Java)

Module I – Introduction to Java

Theory Home Assignment 1 (Module I)

- Q1.What is JDK? List and explain at least five important JDK tools with their uses, for example, javac for compilation and java for execution.
- Q2.What is a Java Class File and how is it generated? Write a simple Java program and explain how it gets compiled into a .class file.
- Q3.What are control statements in Java? Write a program using both an if-else and a switch statement to display the day of the week based on user input.
- Q4.Explain loops in Java with example programs for for, while, and do-while loops, such as printing the first 10 natural numbers using all three types.
- Q5.What are arrays in Java? Explain one-dimensional and two-dimensional arrays with example programs, such as finding the largest element in a given array.
